

Removable lithium-ion battery

Maintenance-free brushless motor

Multifunctional ergonomic handle

Space saving Compact design

The pallet truck is of very high quality and progressive on the market. The motor is maintenance-free and brushless, the 48V lithium battery is removable and is charged using the supplied external 230V charger. The pump truck drives and pumps electrically. The electric drive ensures that moving heavy pallets up to 1500 kg is effortless.

Furthermore, the size of the electric pallet truck is almost the same as the size of a standard pallet truck, so working with the electric pallet truck is much more efficient than with a standard pallet truck.

Easy to operate with the multifunctional ergonomic handle. This handle is equipped with control buttons for driving and lifting, a horn, an emergency button, a battery indicator and a function that warns when the battery needs to be charged. From 5% or lower, the battery indicator starts to flash, so that the battery can be charged in time.

This pallet truck is also equipped with an iron protective cover that provides extra safety.

PALLET TRUCK FULLY ELECTRIC

1500kg 115cm

This Mammuth fully electric pallet truck offers all the advantages of a standard hand pallet truck and extends it with the convenience of electric drive.

product code:

PT15E

Specifications

capacity	1500 kg
fork L x W x H	1150x160x82 mm
lifting range	82 - 190 mm
total width	550 mm
driving speed loaded	4 km/h
driving speed unloaded	5 km/h
max. gradeability loaded	6%
max. gradeability unloaded	20%
turning radius	1353 mm
battery lithium-ion	48V - 10Ah
material wheels	PU
diameter steering wheel	120 mm
diameter load wheel	75 mm

Characteristics

Very compact design
Fully electric, both lifting and driving
Fast lift system
Maintenance-free brushless motor
Removable lithium-ion battery

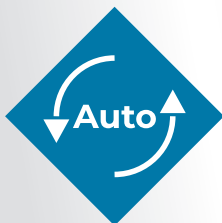

Charging alarm

Removable lithium-ion battery

Maintenance-free brushless motor

Fully automatic

Double Polyurethane front wheels
